MEMORANDUM FOR: Project Weather Officer
Project Logistics Officer
Project Security Officer

FROM: Project Communications Officer

SUBJECT: Facilities Required at the Weather Central Signal Center

1. A recent comm engineering survey of the room selected for the location of the Weather Central Signal Center at Suitland indicated that the following additional facilities are required to properly locate the comm equipment, provide for future expansion, and facilitate the operation of the Signal Center:

a. Installation of five 15 amp electrical outlets along the inside wall bordering on the Weather Central room.

b. Installation of a subscriber service unlisted telephone in the Signal Center to permit proper communications coordination in the event of line outages, etc.

2. It is requested that the necessary action be taken as soon as possible to fulfill these requirements.
